

Prompt:-

I will upload my resume. Act as an AI recruiter and job-hunting assistant.

1. Analyze my resume to identify the most suitable fresher / entry-level roles in India.
2. Suggest top roles I should target based on my skills and background.
3. Find at least 20 real job openings (startups, MNCs, consulting, etc.) with:
 - * Job title
 - * Company name
 - * Location
 - * Short description
 - * Direct application link
 - * Fit score (out of 100) based on my profile
4. Categorize jobs into:
 - * High probability
 - * Medium probability
 - * Stretch roles
5. Suggest quick improvements to my resume to increase selection chances.

Keep the output clear, practical, and tailored to my profile.
